

# DON'T LET YOUR HOME BE A GOLDMINE

Burglars are actively targeting houses which they believe contain jewellery and high value gold.

**Follow these steps to help keep your home and jewellery safe:**

- Jewellery should be stored securely in a suitable safe. Various grades of safe are available according to the value, size and number of items you want to store in it.
- Safes should be supplied and fitted by a company approved by the Master Locksmiths Association.
- Take photos of your valuables and write a short description of each.
- Don't keep large amounts of cash in your home. Store it at a bank, building society or post office.
- Ensure all windows and doors are closed and locked before you go out and before you go to bed. Always use your alarm.
- Be aware of advertising an empty house, by posting messages on Facebook about dates and times of family weddings.
- Register all your property on [www.immobilise.com](http://www.immobilise.com), that way, if we recover your property, we can return it to you.

**If it's an emergency – with someone acting suspiciously in your area, or a crime is happening there and then – call 999.**

For non-urgent enquires, contact us on 101.

**Report a crime online at:**
